HEART FAILURE CLINIC

HEART FAILURE CLINIC TURNING FAILURE INTO SUCCESS

Heart failure is a condition in which the heart is unable to supply sufficient blood flow to meet the needs of the body. Heart failure can cause a number of symptoms including:

- Shortness of breath
- Increased heart rate
- Weight gain
- Swelling of the feet or legs
- Fatigue
- Difficulty performing everyday tasks

Heart failure is a common, costly, disabling and potentially deadly condition.

MISSION STATEMENT

The mission of the Holy Cross Health Heart Failure Clinic is to address the special needs of adult heart failure patients and their families. Our goal is to prolong life and improve the quality of life of our patients.

HEART FAILURE CLINIC

A heart failure diagnosis may sound frightening, but with the right treatment, a heart failure condition can be controlled. Once you are on a stable medical regimen, you can often return to a full and enjoyable life. Understanding your role in taking good care of yourself is important for gaining control of symptoms.

Our goal is to reduce hospitalizations and improve heart failure patient care by providing intensive personalized therapy and by developing individual programs that educate patients about heart failure, optimize chronic medications and help patients manage their disease.

Heart failure management is a team effort, making you and your physician the key players on the team. Our staff will work closely with your physician to keep them fully apprised of your progress.

GETTING STARTED

After you have received your physician referral to our program, contact the Heart Failure Clinic at 954-229-7974 to schedule your first appointment.

If you have any questions regarding the Heart Failure Clinic, please ask for our Clinic Coordinator at 954-229-7974.
