

HOLY CROSS HEALTH INTRODUCES THE KIDNEY DISEASE CLINIC

Holy Cross Health and The Kidney & Hypertension Group of South Florida now offer a specialty-led program featuring a Kidney Health Clinic for your patients with Chronic Kidney Disease (CKD). Our expert physicians' provider State-of-the-Art nephrology care individually tailored to patients affected by CKD to help them successfully navigate the complexities of their healthcare experience and achieve optimal outcomes.

The CKD Clinic services are designed to:

- **Provide a comprehensive evaluation and solution-focused management plan**, encompassing risk assessment and proactive care while empowering our patients and their healthcare advocates through Kidney Disease Education and the promotion of effective shared-decision making.
- **Implement Key Interventions to forestall the progression and complications of CKD** including comprehensive, inter-disciplinary, longitudinal, patient-centered management strategies in close collaboration with the patients Primary Care Physician.
- **Offer timely and convenient access to care** in our Rapid Response, Hypertension, Cardio-Renal, Transplant and Advanced CKD Clinics, and hands-on coordination of the subspecialty care for patients with complex needs including heart disease, diabetes, and other significant comorbid conditions.
- **Deliver seamless care to patients in need of renal replacement therapy** including the timely referral to Certified Transplant Centers.

Our goal is to partner with you to help lead all patients to better health and quality of life.

CRITERIA FOR REFFERAL:

**Adults 18 years or older with an estimated Glomerular Filtration Rate below 45%
(eGFR<45%)**
